CAN YOU WORK OUT HOW MUCH I NEED?

Yes

Please call us on **01527 895955** (with the measurements of the area that you need to cover) and our friendly experienced colleagues will calculate how much you need.
For example, for most gravels and chippings you would want a depth of no more than 50mm / 2 inches (slightly less for 10mm gravels), and an average density for gravels and chippings is 1.5 tonnes per cubic metre.
So an area 10m x 10m at 50mm deep would be 5 cubic metres X 1.5 tonnes per cubic metre = 7.5 tonnes required.
Our bulk bags of gravel or chippings hold 800 to 900kg
So at a depth of 50mm (2 inches) **one bag covers 10m2 to 12m2**

WHAT AREA DO WE DELIVER TO?

WHAT IF WE DON'T STOCK WHAT YOUR LOOKING FOR?

If we don't currently stock what you are looking for we will always do our best to source it for you. We have an extremely wide range of suppliers, and we are usually able to source 'non-stock' products from one of them.

If we get sufficient enquiries for a new product we will usually consider adding it to our stock range (as we did recently with grano dust and the SuDS sub-base products for permeable paving).
